

APRIL 2005—ADDITIONAL Ultrasound Scanner for PATUXENT:

Diagnostic Ultrasound services at RIA's Patuxent Center have been expanded with an additional ultrasound unit, the GE Voluson 730 Expert Series featuring the most current 3-D/4-D scanning capability. Acquisition of the Voluson brings the total number of ultrasound suites at Patuxent to three, increasing the ability to meet the growing demand by area physicians for access to advanced sonographic evaluation using 4-dimensional imaging techniques.
