

## **JANUARY 2005—NEW- STATE-OF-THE-ART DIGITAL FLUOROSCOPY AT HERITAGE:**

Installation of a new digital fluoroscopic x-ray system has been completed, and will greatly enhance the quality and efficiency of fluoroscopic studies (such as those using barium and other contrast materials), for improved clinical performance and to better serve your needs. With reduced dosage and excellent image quality, it is the system of choice for pediatric patients. In keeping with a long-standing commitment to provide the highest quality medical imaging and patient care services, this upgrade provides the latest digital fluoroscopic x-ray technology engineered for convenience, and performance, from a leading manufacturer—Philips Medical Systems of North America.
