

DECEMBER 2003—THE CUTTING-EDGE IN ULTRASOUND:

Upholding a long tradition of leadership in ultrasound, RIA has replaced all of its ultrasound scanners with the latest and most advanced technology features available on the GE Logic 9, bringing the most clinical value across a broad range of applications. Logic 9 systems are now in place at RIA's Patuxent, Pembroke, Heritage and Sterling imaging centers. Image quality is the cornerstone of the GE Logic 9 system. Placed in the hands of trained sonographers and radiologists ultrasound is a powerful diagnostic tool. Clinicians can place a high level of confidence in the quality and accuracy of sonographic evaluations on their patients. Enhance Color Flow Doppler sensitivity provides improved functionality for non-invasive vascular evaluations.
